PROFESSIONAL SUMMARY

Senior Full Stack & AI/ML Engineer with 6+ years of software development experience across e-commerce, healthcare, blockchain, and real-time systems. Combines NextJs, NestJs, Python, C#, and data architecture to deliver web platforms and intelligent automation. Hands-on experience spans Anthropic API integration, RAG, MCP-connected agents, machine learning, AWS deployment, Docker, and GitHub Actions CI. Translates business requirements into maintainable applications, with project work covering marketplace integrations, FHIR-based patient data access, and role-based administration.

TECHNICAL SKILLS

AI/ML/LLM: Anthropic API, Model Context Protocol (MCP), LLM API Integration, Retrieval-Augmented Generation (RAG), AI Agents, Generative AI, AI-Powered Automation, Claude Code, Machine Learning, Deep Learning, Scikit-Learn, NumPy, Pandas, Data Processing

Front-End: Next.js, React.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Back-End: NestJS, Node.js, Express.js, Python, Django, Flask APIs, C#, ASP.NET, REST APIs, GraphQL APIs

DevOps: Amazon Web Services (AWS), Amazon EC2, Amazon S3, Docker, Docker Compose, GitHub Actions, CI/CD, Apache, Cloud Deployment, Release Support

Databases: MongoDB, MySQL, PostgreSQL, Amazon DynamoDB, Redis, SQLite, Firebase

Real-Time Events: Socket.IO, WebSockets, Pub/Sub Messaging, Event-Driven Workflows, Background Jobs

General: JavaScript, TypeScript, Solution Architecture, Microservices Architecture, Technical Leadership, Communication, Cross-Functional Collaboration, Problem Solving, Code Reviews, Git / GitHub

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PureLogics | Lahore | Jan 2023 - Present

- Develop end-to-end web features with NextJs, NestJs, TypeScript, and REST APIs, connecting interfaces, microservices, and data storage.
- Implement Anthropic API integrations, RAG-based retrieval, and MCP-connected agent workflows for application automation.
- Build Python ML and data-processing workflows with NumPy and Pandas for AI-enabled features.
- Implement Socket.IO communication and Modbus integrations to connect application workflows with commercial HVAC equipment.
- Support AWS deployment and Docker environment configuration; troubleshoot releases and optimize application performance.

MERN Stack Developer | Mahir Company | Lahore | Feb 2022 - Jan 2023

- Built the company website, admin panel, and MongoDB-backed APIs; collaborated with product and design teams on features and user journeys.
- Supported AI/ML-enabled features through data preparation, API integration, and workflow automation.
- Collaborated with the server team on AWS deployments, Docker environments, and web/API release support.

SUD Executive | NielsenIQ | Lahore | Sep 2020 - Feb 2022

- Wrote data-processing and visualization scripts for client software, automating repetitive data-handling workflows.

Software Engineer | The A Web Technologies | Islamabad | May 2019 - Feb 2020

- Developed web applications and MongoDB-backed services; wrote unit tests, fixed defects, and improved performance and UI/UX.

Mobile App Developer | Creativeminds | Islamabad | Feb 2019 - May 2019

- Built Java and Kotlin mobile applications integrated with backend services and MongoDB data storage.

PROJECTS

MSQuare Market | Blockchain Wallet & Marketplace

- Contributed to on-chain and off-chain wallet services for crypto-asset acquisition, management, and use across connected platforms.
- Built a NextJs admin portal with role-based access control (RBAC) for managing requests, transactions, platforms, and users.
- Used Redis, AWS, Swagger-documented APIs, and Docker Compose with automated DynamoDB table creation and seed-data loading.

HelloCustom | E-Commerce Automation & Integrations

- Contributed to personalization and order-fulfillment automation across 5 partner integrations: Etsy, Amazon, Printify, Printful, and ICP; supported Shopify integration.

NurseBrain | Healthcare Data Integration

- Implemented FHIR-based patient data access across 2 EHR systems (Epic and Cerner), reducing manual entry through real-time, read-only integration.

SES DLC / Save Energy Systems | Cloud-Connected HVAC / IoT

- Developed AWS EC2-hosted HVAC application services using MySQL, JWT, and Apache; integrated Modbus and serial-port communication.

MAWA | Real-Time Workforce Management

- Contributed to task management, task history, audio/video calling, chat, and multilingual workforce communication.

SpeakShift | AI Transcription & Multilingual Communication

- Worked on video communication with AI-powered transcription, multilingual translation, live captions, and group chat.

AI Agents & Automation Workflows | Personal Projects

- linkedin-job-agent: Python-based local automation for job discovery, CV matching, reviewed applications, and persistent tracking.
- WebShield AI: NextJs/NestJs phishing-analysis app with Python ML; offline temporal evaluation on 36,910 URLs reported 72.87% F1 (96.84% precision; 58.41% recall).
- GitHub Actions CI: Push/PR pipelines run tests, builds, and browser checks; WebShield also validates PostgreSQL/Redis integration and Docker isolation.

Open Source

- **tax-wise**: Income tax calculator for Pakistan with salary and optional bonus inputs.
- **encryptnshare**: Encrypted environment-variable sharing with expiring links and read limits.
- **ai-code-translator**: AI-assisted code translation between programming languages.
- **nodejs-boilerplate**: REST API starter with Swagger documentation.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

AWS Certified Cloud Practitioner (CLF-C02) | Exam in progress

Anthropic: Claude 101; Claude Code 101; Claude Platform 101

Microsoft Office Expert | Microsoft | Sep 2018

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad | Feb 2015 - Mar 2019 | GPA: 3.31

Final-year project: Wedding automation system incorporating JavaScript, augmented reality, and virtual reality.

AWARDS & LANGUAGES

Award: 1st Position, Open House Project Exhibition, COMSATS Project & Career Expo | Dec 2018

Languages: English, Urdu, and Punjabi (fluent)
